SKILLS

Python
Lists, dictionaries, loops, functions, error handling, basic file handling

HTML
Basic

CSS
Basic

GitHub
Publishing projects, README files, GitHub Pages deployment

EDUCATION

Diploma in Engineering, Computer Technology
Dhaka Polytechnic Institute
Session 2025-26
Expected graduation: 2030
Currently studying

Secondary School Certificate (SSC), Science
Boalmari George Academy, Boalmari, Faridpur
Dhaka Board
2025
GPA 4.00

SUMMARY

Computer Technology diploma student at Dhaka Polytechnic Institute with hands-on experience building Python command-line applications: a Grade Calculator, a Quiz Game, and a To-Do List App with file-based storage. Comfortable with functions, lists and dictionaries, error handling and basic file handling, and use GitHub to publish and document my projects. Seeking a Python internship to apply my skills on practical projects and grow as a developer.

PROJECTS

- **Personal Portfolio Website**
  Responsive personal portfolio with dark and light themes, scroll animations and project detail popups. Deployed on GitHub Pages with a custom domain and HTTPS. Built with AI assistance.
  Tech: HTML, CSS, JavaScript, GitHub Pages
  Code: porbo.cyou

- **Grade Calculator**
  Command-line program that collects a student's subject names and marks, calculates the average and assigns a grade from A+ to F.
  Tech: Python, input handling, type conversion, if / elif / else
  Code: github.com/miporbo/python-projects/Grade-Calculator

- **Quiz Game**
  Terminal quiz with five questions stored as a list of dictionaries. Answers are checked ignoring case and extra spaces; shows a final score with feedback and supports replay.
  Tech: Python, lists and dictionaries, for and while loops, functions
  Code: github.com/miporbo/python-projects/Quiz Game

- **To-Do List App**
  Menu-driven task manager to add, view and delete numbered tasks. Validates user input and saves tasks to a text file so they persist between runs.
  Tech: Python, functions, try / except, file read and write
  Code: github.com/miporbo/python-projects/TO DO APP
